Projects

2023

REST countries API

Web development

The "REST Countries API" project is a web development project that involves fetching data from the REST Countries API and displaying it in a user-friendly interface. The project also includes a color theme switcher that allows users to change the interface's color scheme. This is an excellent opportunity for developers to practice their skills in using APIs, HTML, CSS, and JavaScript to create engaging and interactive web pages.

2023

Space tourism multi-page website

Web Development

The "Space tourism multi-page website" is a web development project that involves designing and building a website showcasing the space tourism industry. The website typically includes multiple pages with engaging features such as image galleries, videos, and interactive maps, requiring developers to use HTML, CSS, and JavaScript. The project provides an opportunity for developers to showcase their creativity in web design and proficiency in using web development technologies to create visually appealing and informative websites.

2022

Huddle landing page

Web development

The "Huddle landing page" is a fun and exciting web development project that lets developers flex their creativity and design skills. In this project, you'll create a visually stunning and responsive landing page for a fictional company called Huddle. Using your knowledge of HTML, CSS, and JavaScript, you'll craft an engaging page that provides valuable information about the company's products or services, and encourages users to take action.
